

Expanse Roadmap 4

Q3 2017

TokenLab v1.0

TokenLab is an advanced tool for making and managing crypto tokens on the Expanse network. Users will be able to create tokens, manage their token, add remove features, raise funds, and more.

Gander v2.0

Gander.tech is the official Expanse block explorer. Version 1 was released and is up and running. Version 2 will incorporate a fresh new modern design.

Q4 2017

Borderless Charity Initiatives.

Lucrii v1.0

Lucrii is a modular crypto token that focuses on bottom up economics. The token will feature multiple ways to mint new tokens, like token swapping, proof of stake, and a universal basic income. Amity and Lucrii will work together. Amity is kind of like a scoreboard for philanthropic behaviour. The higher your amity score, the more lucrii you'll get to mint in all of the issuance modules.

Amity Social Network v1.0

Earn rewards for working together to help others. Amity is a social rewards platform that rewards you for your humanitarian effort. Humanitarians will earn Amity points and climb the leaderboards every time they donate to charity, get their friends to join, and launch successful campaigns.

Q1 2018

EXP.LIFE v1.0

EXP.LIFE is a gamification platform, where users can have fun while earning life experience. Users will be able to create and complete user generated content, climb leaderboards, and experience new things!

Borderless.tech v2.0

Borderless.tech is an identity management platform that adds liquidity to human identity. Borderless.tech aims to create a cost effective global ID system that can help emerging markets leap over the last mile into the global markets.

Q2 2018

EXP.DAO v1.0
